

# Installation Instructions

Cable fuse box HSW 1920

#### Intended use

The cable fuse box HSW 1920 is intended to be used in suitable lighting poles.

The cable fuse box HSW 1920 is designed for the connection of max. 3 underground cables.

Any other use of this product requires the consultation with the manufacturer.

#### Safety instructions

When working on electrical systems, the valid regulations such as VDE 0100 must be observed. Installation may only be carried out by qualified personnel or instructed persons in a de-energized state.

#### Service

In the event of malfunctions or complaints regarding the product, please contact your sales representative or the manufacturer.

# Mounting in lighting poles

Remove housing cover

Bevertalstraße 20

D-42499 Hückeswagen

Fax: +49 2192 9166 66

Phone: +49 2192 9166 0

- Remove bridge clamp
- Insert the cable fuse box into open lighting pole and fasten it to the mounting rail

#### Adjust input seal

 Remove the sealing parts at the embossed points according to the number of input cables.

#### Connecting the input cable

- Strip the input cable and remove the filling material
- Insert the input cable so that the outer sheath extends into the connection compartment
- Snap on bridge clamp and screw tight
- Bending, shortening and stripping cable conductors to suit
- Mount or remove the PE/N N connection, if present, as required
- Insert the cable cores into the U-profiles according to the terminal assignment and fasten with the self-locking sliding clamps (torque max. 1,2 Nm)
- Snap the contact hazard protection cover on

# fastening clip sliding gasket output terminals fuses contact hazard protection cover self-locking sliding clamps bridge clamp with inlet seal

#### Connecting the output cable

- Cut off the nipple of the outlet seal to be used
- Slide outlet seal over output cable
- Strip output cable
- Insert the outlet seal with output cable into the slot of the cable fuse box
- Pull the output cable back a little so that the outgoing seal is in full contact with the cable
- Shortening and stripping cable conductors to suit
- Connect the cable cores to the output terminals of the insert (torque max. 0.8Nm) or to special components according to the cable assignment

#### Assembly

Fit housing cover and screw it tight

## **Special components**

 When special components are used, the respective regulations of the devices used must be observed

## **Changing fuse inserts**

- Remove housing cover
- Remove screw caps and change fuse insert
- Attention! Do not remove the contact hazard protection cover! It prevents from the accidental contact with live parts!
